U.S. GEOLOGICAL SURVEY
NATIONAL OCEAN SERVICE

1981

Produced by the Geological Survey and the National Ocean Service
Compiled from USGS 1:24 000-scale topographic maps dated 1965–1967
Planimetry revised from aerial photographs taken 1976 and other source data. Revised information not field checked. Map edited 1981
Bathymetry compiled by the National Ocean Service from tide-coordinated hydrographic surveys. This information is not intended for navigational purposes
Mean lower low water (dotted) line and mean high water (heavy solid) line compiled by NOS from tide-coordinated aerial photographs. Apparent shoreline (outer edge of vegetation) shown by light solid line
Projection and 10 000-meter grid, zone 10, Universal Transverse Mercator
25 000-foot grid ticks based on California coordinate system, zone 5
1927 North American Datum
To place on the predicted North American Datum 1983 move the projection lines 7 meters north and 89 meters east
Offshore protraction survey data, shown in red, furnished by the Minerals Management Service. Heavy lines indicate limits of Outer Continental Shelf Official Protraction Diagram dated May 11, 1983. The protractions on this map are not for Federal leasing purposes; for such purposes, refer to OCS Official Protraction Diagrams available from the Minerals Management Service
Limited revision and bathymetry added 1988
Certain land lines are omitted because of insufficient data
There may be private inholdings within the boundaries of National or State reservations shown on this map
